

# Introducing...

# LEGACY<sup>BASIC</sup>

advanced digital lens technology  
from IcareLabs

## The Legacy Basic:

## A digital alternative to traditional value progressive designs

The IcareLabs' Legacy Basic lens offers a value-priced lens in a digital freeform design. The Legacy Basic is a smooth design offering wide fields of view in all three viewing areas. It compares well with traditional molded designs at twice the price. This lens is a great option for your price conscious patients, offering them ease of fit and wide fields of view not found in traditional value designs. It is available in regular or mini versions with compensated add to ensure your patient the perfect reading experience. Available in CR-39 and Polycarbonate in clear and Transitions VII. The Legacy Basic and Basic Mini combine the accuracy of digital with a value lens price giving your patient the best value lens available.

*This lens is a great upgrade for value-driven patients who use Shoreview®, Hoya Amplitude®, or Essilor Adaptar®. And, it comes with a complete Doctor Rx change and non-adapt warranty.*

### Surface Power
