

Introducing...

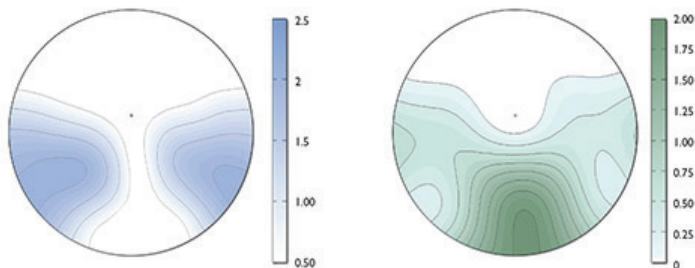

Digital Surfaced Technology

The IcareLabs' Legacy Pro lens is a well-proportioned digital lens which utilizes a design that is similar to others' premium molded designs. The Legacy is a balanced lens with wide distance and near zones, partnered with a good intermediate zone. This lens is the ultimate option for standard use. It is available in a regular and short corridor design with variable progressive lengths found only in digital lens designs. Unlike many digital designs, the Legacy can be ordered with specified base curves and is available in almost all material options. The technology uses guarantees that the power measured in the lens will always match the prescribed Rx. This creates a lens that easily understood by the practitioner. The Legacy combines the accuracy of digital with the ease and flexibility of conventional designs to give you a lens value second to none.

Patients who use Varilux Comfort®, Varilux Ellipse®, Shamir Piccolo®, AO Compact® are a great match for Legacy Pro Lenses.
